## 2026 MARY-CLAIRE WARD GEOSCIENCE AWARD WINNER

This year's recipient of the Mary-Claire Ward Geoscience Award is Nicolas Gomez from Memorial University of Newfoundland. Nicolas' doctoral research investigates the sedimentary, geochronological, and geochemical record of the Gaskiers Glaciation (589–580 Ma) preserved in the Bonavista Peninsula, Avalon Zone, Newfoundland. The study aims to disentangle the climatic and tectonic controls that shaped the Ediacaran glaciogenic successions of West Avalonia and to refine their temporal and stratigraphic framework through field mapping integrated with multi-proxy geochronology.

Nicolas will receive his award at the Student-Industry Mixer, on Tuesday, March 3.

The award is administered by the Geological Association of Canada (GAC), the Prospectors & Developers Association of Canada (PDAC), the National Geological Surveys Committee, the Canadian Geological Foundation, and Watts, Griffis and McQuat Ltd.

**2027 Application details will be posted at [www.pdac.ca](http://www.pdac.ca) and [www.gac.ca](http://www.gac.ca) on October 1, 2026.**
