WELCOME MESSAGE
FROM THE PRESIDENT

For more than nine decades, the PDAC Convention has been the global mineral exploration and mining industry’s leading event. Since 1932, it has grown in size, stature and influence—bringing together more than 27,000 participants in 2025, including leaders from government, business, academia, Indigenous communities, and every part of the industry.

Year after year, the Convention is where relationships are renewed, new partnerships are forged, and the future of mineral exploration takes shape.

PDAC 2026: The World’s Premier Mineral Exploration & Mining Convention will take place March 1–4, 2026 in Toronto, Canada, bringing together international participants for four days of learning, discovery and connection. With more than 1,300 exhibitors and 700 presenters, attendees can expect outstanding educational programming, vibrant networking events, meaningful business opportunities, and a wide range of social gatherings and celebrations.

Our programming reflects the most pressing issues facing the sector today: securing access to capital and land, advancing reconciliation and Indigenous partnerships, driving innovation and sustainability, and supporting the transition to cleaner energy. From the bustling Trade Show and Investors Exchange to the Technical Program and Short Courses, there is something for everyone—whether you are a student, early career professional, or an established leader in the industry.

We are also proud to support the next generation through initiatives such as the Student & Early Career Program, the Indigenous Youth & Early Career Ambassador Program, as well as funding opportunities such as Student Accommodation and Convention Travel, and the Dr. Donald M. Leishman Convention Experience. These programs open doors for students and emerging professionals, foster mentorship, and help build a strong and sustainable future for the industry.

Covering more than 600,000 square feet at the Metro Toronto Convention Centre, PDAC 2026 promises to be another dynamic and expansive showcase. I encourage you to explore the full program and plan your experience at www.pdac.ca/convention.

We look forward to welcoming you to PDAC 2026.

Karen Rees
PDAC President

The future of responsibly produced resources is clear.

It's happening now.

As the world continues to grow and urbanize, so does the need for essential resources to be responsibly produced.

Resources like copper to help connect us and potash to help grow more of the food we need.

This is what BHP is committed to, wherever we operate.
